Expertise: AI & Agentic Product Design · Product Strategy · End-to-End Product Design · UX Research & Discovery · Enterprise SaaS & Consumer Experience · Design Systems · Product Analytics · Cross-functional Collaboration & Leadership

I'm Mon 🙋 a Senior Product Designer with 10+ years of experience helping start-ups, scale-ups, and enterprise organisations build products that solve complex customer problems through thoughtful, evidence-driven design. I partner closely with product and engineering teams to translate ambiguity into clear direction, balancing customer needs, business goals, and technical constraints. Outside of product, but related to my love for helping people, I'm a qualified nutrition coach and personal trainer.

I've established and scaled design systems and discovery and design practices that have improved decision making and product maturity across organisations. More recently I've been moving to a Product experience lead role, focusing more on discovering, designing and building AI and agentic experiences that reduce friction and enhance decision making while keeping people top of mind.

I thrive in autonomous, collaborative environments where continuous discovery, experimentation, and curiosity lead to products that create meaningful impact.

Work Experience

READYTECH — Product Experience Lead + Senior Product Designer

Oct 2025 - present

Leading end-to-end product design across HR, payroll and workforce management products used by thousands of businesses. Partnering with Product and Engineering to drive discovery, product strategy and delivery while introducing AI-powered experiences that simplify complex workforce operations.

- Design AI-powered experiences that streamline workforce management while ensuring AI augments human expertise rather than replacing it.
- Established ReadyTech's first Design System, creating a scalable foundation across multiple products and improving consistency and delivery efficiency — systems thinking applied at company scale.
- Own discovery through delivery across multiple workforce management products, translating ambiguous customer insights into measurable product outcomes.
- Introduced continuous discovery practices, helping teams prioritise real customer problems over feature requests.
- Facilitate product strategy workshops that align leadership, Product and Engineering around customer outcomes and business goals.
- Partner closely with Product Managers to shape roadmap priorities using research, analytics and customer evidence.

WOLTERS KLUWER (AU) — Lead CX/UX Designer + Senior User Experience Designer

Sept 2021 - Oct 2025

Led product design across complex enterprise legal and tax platforms used by more than 50,000 professionals, partnering with global product, engineering and editorial teams.

- Discovered, built and validated AI-powered solutions for legal and tax professionals, to help them be more efficient by eliminating low-value tasks so they could focus on the work that actually mattered to them and their clients.
- Rebuilt the platform using the global design system, eliminating technical debt and creating a scalable foundation for future product development as well as contributing new components back to the design system.
- Led the UX strategy for a 50,000+ customer platform migration, delivering a low-friction transition that minimised churn while improving the overall experience.
- Drove research from discovery through validation, translating complex professional workflows into intuitive, evidence-based product experiences.
- Balanced regulatory accuracy with usability, designing complex workflow tools that reduced friction and improved task completion.
- Contributed to a product NPS of +30 through continuous, research-led improvements to customer workflows.

Worked as a UX consultant supporting global teams to embed customer-centred design practices, solve complex user problems, and kickstart experience-led product development across legal, tax, health, and compliance platforms.

- Partnered with product, business, and technology teams to identify customer needs, uncover opportunities, and translate insights into actionable product improvements.
- Helped teams adopt experience-focused ways of working through workshops, design sprints, discovery activities, and collaborative product strategy sessions.
- Co-created Wolters Kluwer’s first global Design System, establishing scalable patterns and practices adopted across multiple international product portfolios.
- Led end-to-end UX design initiatives, including the global corporate website redesign from strategy and research through to launch.
- Delivered research-led design solutions for complex enterprise SaaS products, simplifying workflows and improving experiences for professional users.

Worked in a fast-paced digital agency environment, delivering end-to-end digital experiences for clients across multiple consumer industries. Owned the full UX lifecycle from discovery and research through design, testing, development support, and continuous improvement.

- Conducted customer research, stakeholder interviews, journey mapping, usability testing, and A/B testing to uncover insights and validate design decisions.
- Designed user flows, wireframes, prototypes, and high-fidelity UI solutions across web and digital products, balancing customer needs with business objectives.
- Collaborated closely with developers throughout delivery, providing design support, conducting QA testing, identifying bugs, and working through solutions to ensure high-quality experiences.
- Partnered with clients and internal teams to translate business challenges into user-centred digital solutions from concept through to launch.

Education & Certifications

Bachelor of Communication & Multimedia Design

Sept 2011- June 2015

Bachelor focused on Web Design and Development, Visual design, Marketing, Game design, Film, Writing & Storytelling and a 6 month Film Studies Minor in Minnesota at MNSU (Grade: A)

Advanced UX Certificate — UX Academy

February 2017

Diving deep into UX strategy, how to drive change and using (user) data to make evidence based decisions

Lean Product Management — Pragmatic Marketing

May 2019

Mastering market-driven product strategies using the Pragmatic Framework to identify high-impact opportunities, align cross-functional teams, and execute data-backed decisions throughout the product lifecycle.

Nutrition Coach L1 — Precision Nutrition

Oct 2022 - Sept 2023

Cert III & Cert IV in Fitness — International Fitness Academy

Oct 2022 - June 2023
